Annual Dramatic Competition at The High School

Three Comedies and Three Historical Tragedies on Program

A dramatic competition, sponsored by the High School Students Union, will be held in the school on Friday, March 3rd, commencing at 8 p.m. sharp. This has become an annual event among the high school students and is looked forward to as the most literary program of the year. Three judges will be appointed to pick out the best plays. The program consists of three comedies and three historical tragedies. The comedies are "The Taming of the Shrew," "A Midsummer Night's Dream," and "The Merchant of Venice." The tragedies are "Julius Caesar," "Macbeth," and "Hamlet." The plays will be performed by the school drama club, which has been working hard to perfect their acting skills. The judges will select the best actors and actresses, and the winning plays will be awarded prizes. The event is expected to be a great success and to draw a large audience.

Two Hockey Games Here Last Sunday

Suffield and Piapot Both Won Their Games

Several hockey teams played two more games last Sunday and both were won by the home teams. The first game was between Suffield and Piapot. Suffield won by a score of 3 to 1. The second game was between Piapot and another team. Piapot won by a score of 2 to 0.

The first game was Sunday morning when a return game was played with the combined Suffield and Medicine Hat line-up. Although Redcliff was short a few first stringers those who took the field made a good showing. The visitors were a little hindered when working close in on the net and back, the lead early in the game, maintaining it to the finish. The game ended 5-2 in favor of the visitors.

The game in the afternoon with Piapot was a hum drum affair to finish and keep the fans on their toes all the time and the beauty of it was a nice, clean game all the way through.

The teams were very evenly matched and it was anybody's game right up to the finish. Any little edge there was visitors had it and they won out 5-1. They are a nice bunch of fellows and made quite a job with both the fans and the players.

The Piapot boys were billed out for dinner with the members of the Redcliff team, after which both teams gathered at the home of Mr. and Mrs. J. Podewer, where a pleasant evening was spent.

Annual Meeting of Local Red Cross

The annual meeting of the Redcliff branch of the Canadian Red Cross Society will be held in Gordon Memorial school room on Tuesday, Feb. 28th at eight o'clock in the evening. All interested are invited to attend.

Dramatic Festival For District Schools

A dramatic festival will be held in Medicine Hat about Easter time. The contestants will be pupils of the 60 or more public schools in the district. The festival will be a great success and will draw a large audience.

Although eliminated from the intermediate championship the Hat Monarchs are still in the Morgan Cup competition. The Hat will meet either Calgary or Drumheller in the Hat this week-end.

Arrangements have been made for the final games in the Midweek hockey series to be played in Medicine Hat on March 2nd and 3rd, with the Safeways team. It is not known yet whom they will have to play.

Utilities Commission Is To Visit Redcliff

Will Discuss Town's Finances with the Council --- Standing Committees Appointed For The Year

The regular meeting of the Redcliff Executive, J. E. Tarrant was appointed assessor for the year.

It was decided that regular meetings be held the second and fourth Monday of each month as in the past.

Councillor Hargrave was appointed deputy mayor for the first three months.

The School Board wrote asking for \$1,000 for school expenses. The request was granted.

Two applications for the old age pension were received and approved.

The usual accounts were approved for payment.

Three new applications for relief were received.

The matter of the appointment of auditors was left till after the visit of the Board of Utilities to the town.

A letter was read from the Utilities Commission stating that the commission would visit Redcliff in the near future for the purpose of discussing the town's affairs with the council.

DISTRIBUTE FORAGE CROP SEED IN ALBERTA

In view of the success which has attended the policy of distributing forage crop seed among selected farmers in the province for the encouragement of the production of forage crops, a continuance of this policy for 1933 has been decided upon, according to the provincial field crop branch.

Applications from farmers wishing to participate in the distribution of this seed are now being received by the provincial department of agriculture.

Water Works - councillors Lavell, Hargrave and Sangster. Public Works - councillors Shaw, Broughton and Newnam. Relief - Sangster, Hargrave and Shaw. License and Police - councillors Broughton, Newnam and Lavell.

Fire and Light - councillors Newnam, Broughton and Shaw. Board of Health - Dr. Ward and Messrs. W. Pickering and H. Champ.

Councillor Sangster was appointed to represent council on 2 p.m. Thursday and Saturday.

REDCLIFF TRAIN SERVICE

West Bound—No. 1 6:01 p.m. East Bound—No. 2 8:42 a.m. No. 4 10:27 p.m. Mixed, due on 2 p.m. Thursday and Saturday.

How Canada Gets and Spends

A study showing the production of wheat in Canada in 1932. The chart shows that the production of wheat in 1932 was 1,000,000 bushels, which is higher than the production in 1931 (800,000 bushels) and the current production (600,000 bushels). The chart also shows that the value of all field crops in 1932 was \$1,000,000,000, which is higher than the value in 1931 (\$800,000,000) and the current expenditures (\$600,000,000).

Big Attractions Coming To Dreamland Theatre

The Management of The New Dreamland Theatre wishes to announce to their many patrons of Redcliff that they have been successful in securing many outstanding productions for showing this season.

Watch their space for further particulars. This theatre has been thoroughly renovated, New Talking Equipment installed, and many added features for the convenience of their Patrons.

You are always assured of a well balanced Program, and your comforts are always catered to. Visit The New Dreamland and see for yourself.

Pound Keepers Named For This District

The Alberta Gazette contains the following list of pound keepers who have been appointed for this district for 1933: H. S. Ashles, Suffield; W. Bowman, Redcliff; H. Duce, Redcliff; O. Forns, Redcliff; A. Geis, St. Paul; E. Hansen, Bingley; I. C. Jones, Brutus; J. Marx, Bingley and J. T. Watkins, Medicine Hat.

Almost immediately after cards were furnished the crowd grew and by the time the orchestra got their instruments tuned up the floor was comfortably filled. The attendance, however, was not as large as was expected. This was evidently due to the fact that there were several other attractions at surrounding country points which were attended by a number of townspeople. As a result the hockey boys will be slightly in the hole, as they had gone to considerable expense, purchasing prizes, to make the event a success.

Enjoyable Afternoon At The Parish Hall

An enjoyable time was spent by all who attended the whit all bridge drive in the Parish hall on Wednesday afternoon, Feb. 22nd and the auspices of the S. W. A. of St. Ambrose church. The prizes were as follows—Bridge, first prize, Miss B. Teater; consolation, Mrs. Schneider. Whit, first prize, Mrs. Sowerby; consolation Mrs. S. Britt. Miss Margaret Rutherford drew the lucky ticket on the raffle and, as a result, received a very fine table cover.

Churches

ST. MARY'S CHURCH

Celebration of Mass every Sunday of each month except first Sunday, at 8:30 a.m.

GORDON MEMORIAL UNITED CHURCH

Pastor: Rev. R. Erskine Pow Sunday, Feb. 26th.
10 a.m. Church School.
11:15 a.m. Morning Worship Subject: "Our Great Lack."
7:30 p.m. Evening Worship. Subject: "Ambition."

To sense one's own failure and the Divine aid, is to become a Christian.

ST. AMBROSE CHURCH

Rev. Male in Star at, Vitar 9 a.m. Holy Communion. 10 a.m. Sunday School. 1st and 3rd Sundays 11 a.m. Social Fellowship. 2nd, 4th and 5th Sundays 11 a.m. Mattins and Sermon. 7:30 p.m. Evensong and sermon.

Hockey Club Has Enjoyable Social Evening

Crowd Was Not As Large As Was Expected

If one is to judge by the poor turnout for cards at the last two or three evenings which have been advertised for a whilst event and un-er, it is quite evident that cards are not so popular as they once were, especially among the younger crowd.

The event held last Friday evening, under the auspices of the hockey club, was no exception. When the time arrived for the drive to start only about eight players for six tables had put in an appearance. However as go prizes were offered the competition was keen and close, and much enjoyed by all who took part. Miss Tester won the ladies' first prize and Miss Oakland the consolation. The gentlemen's first was won by S. Patterson and the consolation went to E. Podesta.

Almost immediately after cards were finished the crowd grew and by the time the orchestra got their instruments tuned up the floor was comfortably filled. The attendance, however, was not as large as was expected. This was evidently due to the fact that there were several other attractions at surrounding country points which were attended by a number of townspeople. As a result the hockey boys will be slightly in the hole, as they had gone to considerable expense, purchasing prizes, to make the event a success.

During the evening Erwin Schmidt and Miss Tricky Sullivan gave an exhibition dance which drew much applause and flattering comment from the spectators. These young people are clever, versatile dancers; full of music and grace and with just enough of the vivacity of youth to make them glide along with wonderful smoothness and confidence.

Mrs. Gibbons of Suffield is spending a few weeks with Mrs. Scanlan.

Master Dickie Hargrave celebrated his sixth birthday last Saturday, when several of his friends were entertained at his home to a happy birthday party.

A number of neighbors met at the home of Mrs. A. Kimm, recent bride to arrive in town, to have her a miscellaneous and a hearty welcome to Mrs. Kimm just recently arrived from the old land and was married last Saturday to Andy Kimm who has figured prominently in football circles for last season.

Medicine Hat Monarchs are now out of the provincial intermediate championship—playdowns as a result of their defeat in Lethbridge last Monday at Blairmore. The score was 2 to 1, making 4 to 6 for Blairmore on the series. It was a hard game for the Monarchs to lose as they played a wonderful game.

Only the best is good enough for Baby

Proved purity and quality upon which no imitation can possibly improve.
For 80 years the favorite arrowroot biscuits in Canadian homes.

Christie's PURE Arrowroot Biscuits

Tabulating The Census.

In this machine age, and during a period of unemployment on a scale never before experienced, there is a tendency in some quarters to lay the chief blame for the prevailing unemployment to one factor—the machine. It is being argued that man has been the great inventive genius who has succeeded so well that he is putting himself out of work; that the machine is now doing what man himself ought to do. It cannot be denied that the machine has displayed man-power in many directions and ways. But, conversely, it cannot be denied that the machine has developed so many new things and made them accessible to masses of the people who would otherwise be denied them that, in other directions and ways, the machine has created employment for man. Many examples of this might be given.

Aside from this, however, there is another factor that is too often overlooked, and that is, hundreds of things are now being made and done by machinery which would never be done at all if we had to depend upon man-power to do them. They would be economically impossible, and but for the machine, man would simply be denied these things which the machines now do or provide for him. In such instances the machine is not depriving man of employment, but is merely adding to the sum total of the world's goods, services, conveniences, even knowledge.

Let us devote this article to a concrete illustration of this fact, gleaned from a most interesting newspaper article. Can you imagine a machine that counts 560 separate facts at the same time? Can you imagine another that detects man-made mistakes? Yet the inventive genius of a Canadian has evolved such machines which are now at work in the Census Bureau at Ottawa, machines which are anything but the simple, old-fashioned counting machines of yore, and which, as many, or more, persons are employed in the Census Bureau as in former years, but they are making thousands of calculations now possible which otherwise would never be made.

The 1931 census of Canada now being tabulated is the biggest job of its kind ever undertaken in this country. Were it not for the two machines referred to it would cost three times as much as it will to tabulate the information which will be published, and it would, therefore, never be undertaken. In addition, much more information will be compiled than will be published, but it will be available if and when required.

The two machines are the census writer and the tabulator. The first detects errors and the second counts 240 different facts from individual cards at the rate of 240 cards a minute.

The data taken by census enumerators is transferred to small cards by punching holes for each fact recorded. A hole is punched in the proper place to indicate the sex, age, religion, nationality, language, racial origin, and other things of the person being recorded. This card is then sent to the tabulating machine to check possible errors or omissions on cards on which conflicting pieces of information are recorded. For instance, if a person's age is 25 and he is listed by mistake as a non-voter, under 21, the card is thrown out and the machine will send back for checking to correct the discrepancy.

If a man gives his racial origin as Jewish and his religion as Baptist the card is thrown out and re-checked. If the sex is omitted the card is sent back. The machine can also detect a straight error in a single fact, such as the wrong age, or the wrong race, but it can also detect all discrepancies of conflicting data.

The tabulator is the only machine in the world which will count 240 separate facts at the same time, and as already stated, it does it at the rate of 240 cards a minute.

Just how these two uncanny, almost human, machines do their work appears will not permit of a description, intensely interesting as it would be. They were invented by A. E. Thomson, mechanical chief superintendent of the Dominion Bureau of Statistics, and were built in Ottawa under his direction and that of his assistant, F. Bellisle. These two men worked for three years on their place. They had some little difficulty persuading the Government to allow them to build the machines as commercial manufacturers would not and said they would never work. The machines have been working for 15 months without a hitch.

The next largest machine in the world is at Washington and is used by the United States Census Bureau. It, however, tabulates only 60 facts at a time compared with 240 tabulated by the Canadian machine. The largest commercial machine in the world tabulates only 36 facts and cannot be bought. It can only be rented. Before the next U.S. census is taken, Mr. Thomson's machine will likely be in operation at Washington. Canada is really ahead of the United States in this respect.

Development of a machine with no comparison of the theory of necessity being the mother of invention. Had Mr. Thomson and Mr. Bellisle not set to work in this country, the machines which they have now invented, Private companies would scarcely devote time and money to have been because there is little market. The machine is of use only for census purposes.

So much information is now being tabulated much more information than ever before, and which, without the machines, never would be tabulated. So much information that it is stated, if it were all published the volumes would fill the Parliament Buildings at Ottawa and the printing costs would equal the cost of a transatlantic cable. The Canadian Railways. By careful selection the Bureau will decide what will be published, what figures will be of greater use to the people of Canada as a whole. But the whole picture is being set in the Ottawa. The Bureau of Statistics will be a veritable guide map for research workers and students of sociology and economics, however all this information, carefully tabulated, will be available to them.

Her Heart Was Weak Nerves Shaky, Nights Restless

My new advertisement for Millon's Heart and Nerve Pills decided to try them although I did not have much faith, but now I can say thank God it was as they have proved of wonderful help to me.

I am now strong and well again, but am never again a host to the house."

New Tire Guarantee Announced

New Warranty Hoped To Result In More Satisfactory Service

Much of the confusion incidental to tire adjustment claims will be eliminated by a new guarantee announced by all standard-line tire manufacturers. The companies believe that no longer will consumers find themselves in dispute with dealers or manufacturers as to the validity of their claims.

The new guarantee, planned to remove all contentions, possibilities, warrants tires used in private passenger car service for 9 months or 12 months, depending on the type of tire, and a guarantee certificate accompanies each tire.

All road hazards, excepting punctures and turning flat, are covered by the new guarantee and provision is made for a satisfactory repair or a pro rata adjustment based on the term of the guarantee. It will be seen that, under this new warranty, allowance will be made for such injuries as stone-bruises, cuts, wheels out of line, faulty brakes, etc., not previously covered by tire guarantees. This is a new and definite advantage to the tire user.

Dealers are now selling tires under this new guarantee and motorists are warned that a certificate should be obtained with each new tire. The new guarantee covers, also, tires sold as passenger car or on passenger cars to be used in private service.

Leading tire manufacturers believe the new warranty will result in more satisfactory automobile service, through the elimination of disputes and the broadened coverage of the warranty.

Special Garment Grades Asked

Committee Would Like Legislation To Become Effective In 1934

Three special grades will be set up for garment when it is recommended by the Westminster Garment Manufacturers' Association that the committee be accepted by the Federal Government, Hon. R. S. Dandies, assistant grain commissioner for Saskatchewan, announced on his return to Saskatoon from a meeting of the committee at Winnipeg. The committee will ask the government to pass the necessary legislation to become effective in 1934.

The committee would, however, leave it to the Board of Grain Commissioners to bring the new grades, No. 1 C.W. Garment, No. 2 C.W. Garment, and No. 3 C.W. Garment into effect any time prior to the harvesting of the 1934 crop if deemed desirable.

It was pointed out, Mr. Dandies added, that the possible large carry-over at present in the new grades, No. 1 C.W. Garment, No. 2 C.W. Garment, and No. 3 C.W. Garment into effect any time prior to the harvesting of the 1934 crop if deemed desirable. It was pointed out, Mr. Dandies added, that the possible large carry-over at present in the new grades, No. 1 C.W. Garment, No. 2 C.W. Garment, and No. 3 C.W. Garment into effect any time prior to the harvesting of the 1934 crop if deemed desirable.

'Not Enough To Go Round'

Farmers Keep On Getting Poor Breeding Stock

Reports received by A. A. Macmillan, Chief of the Sheep and Swine Division of the Dominion Department of Agriculture, show that Saskatchewan breeders, like hog breeders all over Canada, are particularly keen on getting pure bred breeding stock. All the pure bred stock from the Industrial Farm at Moose Jaw were purchased by the Dominion Department for distribution under the Breed Stock policy. And while this looked like a large order to dispose of, it was not so for the fact that the quality stock that it literally sold itself; and, as a matter of fact, it has been quite impossible to service the large number of enquiries for pure bred stock which this sale attracted.

Communists Object

The Klu Klux Klan of Timmins, Ont., has undertaken a campaign to secure a day's pay from every employed person to assist those in need. According to the Porcupine Advance, it is meeting with general success. It is meeting with opposition from the Communists element which has issued a circular urging abuse on those promoting the plan—Toronto Globe.

Building cement is affixed through such an arena that it is possible to hold water in them.

According to the 1930 census South Carolina has the highest percentage of illiteracy.

New Soviet Russia Trades

Demands Cash From Others But Unlimited Credit For Itself

How the barter scheme with Soviet Russia would work out we will very likely not be allowed to know because the Canadian Government is asked to guarantee \$4,000,000, but in the case of a real trade agreement we get some idea. Italy has a trading post drawn up in 1934, which expires next August, and the Italian Government has apparently had enough of it as notice is expected to be given within the next few weeks to terminate it. Not only has the trade been very one-sided, but while the Soviet demands cash for Italian products, it demanded four years and four months out of itself. Now the Soviet has put forward terms for longer credit. That might be five years, six years, seven, or how long will you give.

Much as nations want trade, five years or more credit compared with cash "is a bit too thick."—St. Thomas Times-Journal.

Canadian Seeds Exchanged

Canadian Wild Flower Seeds For Planting On War Graves In Europe

A report issued by the Division of Botany of the Dominion Experimental Farms Branch shows that the annual exchange list of seeds, collected from the war graves in Europe, in the arboretum, comprised some 1,537 species, and a total of 4,802 packets of seeds, 100 rooted plants and 11 cuttings were received from foreign gardens. Special supplies were obtained as required, for scientific workers in Canada. Two hundred packets of seed of Canadian wild flowers were sent to the War Graves Committee for planting on the battlefields of Europe. Other activities included studies of the life history of noxious weeds, and of chemical methods of eradication.

Studio At Coast

British Films To Be Produced In British Columbia

A studio for production of British moving pictures will be established in British Columbia. It was announced by Major C. Fairbairn Smith, former British army officer who has superintended construction of large studios in Hollywood. The announcement follows the incorporation of the British-American Film Company at Victoria.

The studio will be rented to various Hollywood producers who desire to continue in the British market under the Empire Code laws. In addition, the company will make at least eight productions of its own each year under the direction of Edward Carver, who has been engaged by the company, Major Smith added.

The company will be under British control as far as the British market is concerned, while the staff and actors will be 75 per cent. British.

Shows Star Movements

Young Amateur Astronomer Builds "Stararium" In St. Louis

A miniature planetarium which is said to unfold the drama of the firmament in much the same manner as does the \$1,000,000 Alder planetarium in Chicago has been built at St. Louis, Missouri, by Stuart O'Brien, 27-year-old amateur astronomer.

O'Brien says his model a "stararium" since, he says, it shows only star movement, while a true planetarium, of which there are only two in the United States, shows the movements of the stars, planets, sun and moon in their proper position in relation to the time of the year and the latitude from which observed.

It takes thirty-five men about an hour to install the model in the Capitol at Washington, and 4,300 pounds of paint are mixed for the task.

Over 55,000 pounds of herring scales have been sold by fishermen of New Brunswick to manufacturers of artificial pearls.

DR. HAMILTON'S PILLS FOR HEADACHE, INDIGESTION, BILIOUSNESS, CONSTIPATION

A passenger on a railroad runs only one chance in 37,500,000 of getting killed, statisticians announce, and while the chance of getting a cinder in the eye?

More than 56 out of every 100 women in Latvia are engaged in gainful occupations.

CHEST COLDS Best treated externally

2 WAYS at once!

When a cold goes down into the chest, take no chances. Go to bed and start Vicks VapoRub treatment.

Rub Vicks vigorously over throat and chest and cover with warm blanket. Relief is two-fold.

(1) By stimulation—Through the skin like a plaster Vicks "draws out" tightness and soreness.

(2) By inhalation—Its medicated vapors released by the heat of the body are inhaled direct to the air-passages.

To increase the stimulative effect of the inhalation, hold your throat and chest with hot wet towels before applying Vicks.

Relief The slight cough of children can usually be relieved by one application of Vicks. Just rub on freely over chest with warm blanket.

OVER 26 MILLION JARS USED YEARLY

Forage Crop Distribution

Policy Instituted Last Year Is To Be Continued

The forage crop distribution policy inaugurated last year by the federal minister of agriculture, the Honorable Robert Weir, is to be continued in 1933. This policy was designed to encourage and stimulate the production of seed grasses and clover in order that more feed of good quality may be available for livestock and thus develop permanency in agriculture, in the areas where it is possible, to do so.

There has been named a provincial committee to handle this work, composed of T. M. Stevenson, agricultural director, forage crop, laboratory, Saskatoon, who is responsible for supplying information on varieties, methods of growing and other technical data; S. H. Vigor, field crop commissioner, provincial department of agriculture, Regina, who is responsible for the selection of growers, and will, therefore, receive all applications from farmers wishing to participate in the distribution; and Nelson Young, district inspector, Dominion seed branch, Saskatoon, who will purchase and distribute the seed and also be responsible for the collection of same.

Selected lots of bromus, western vernal clover and alfalfa will be distributed. Any farmer may apply for one kind of seed grass or clover, where the maximum acreage is 20 per cent. In the case of alfalfa, seed for 10 acres can be secured, and consideration may be given an application for alfalfa and other grass.

The total acreage should not be allowed, would be 25, that is a grower may get alfalfa for 10 acres and bromus for 15.

Applicants must agree to return pound for pound of seed of equal grade from the first satisfactory seed crop, or pay in cash one-half the actual cost of the seed delivered within two years. The return of seed or payment will be made to the Dominion seed branch.

A perfected apparatus, which will enable the deaf and dumb to hear, and so learn to speak—was demonstrated in the office of Hon. Dr. J. D. Donahue, Ontario Minister of Public Works, under whose direction it was constructed. It is developed on the principle of sound amplification and is a simple device to attach to "hearing" machines now in use.

Apparatus For Deaf

By making use of direct heat last year Canadians got along with 27,514 fewer automobiles in 1932 than in 1931, according to statistics in the automobile industry, compiled by the Dominion Bureau of Statistics. The apparent consumption of new automobiles in Canada during the year was 49,364, while 76,756 were bought in 1931.

The "tourist" industry has fallen to half million miles in France, as compared to 1,000,000 foreign visitors a year before the World War.

Best and Most Effective Way Is To Reduce Acreage

We have led the world in increasing wheat acreage following the disappearance of Russia and the Baltic countries from the war's exports. There is every reason why we should now set the example of reducing acreage. All the world wheat conferences which could be held, all the legislation which could be sought, would not be so effective in the direction of improving wheat prices as this one step—Winnipeg Tribune.

Continuation of the drought in the high-belt grazing regions is threatening South Africa's livestock this season.

The "tourist" industry has fallen to half million miles in France, as compared to 1,000,000 foreign visitors a year before the World War.

Made Old Cures Do

Great Drive Of Reindeer From Alaska To Canada To End Early This Spring

In March or April of this year the great drive of reindeer from Alaska to Canada's North West Territories is expected to be completed with the placing of the herd on the winter grazing range to the east of the delta of the Mackenzie River and the work of building up a new source of supply of food and clothing for the Dominion's northern natives will be begun. Department of the Interior representatives will take delivery of the herd from the men who have conducted the movement across the thousands of miles of Arctic terrain.

The most recent advice of the herd was contained in a wireless report received by the Dominion Lands Administration of the Department of the Interior in the district of the herd with the herd of approximately 2,300 animals had been effected at Key West, Alaska, about twenty miles south of Denman Point, which is the point where the boundary between Alaska and the Yukon Territory of Canada reaches the Arctic Ocean. A party from the Canadian reindeer station had been sent out on November 22 for the purpose of getting in touch with the drive and to accompany it in the crossing of the Mackenzie. On December 4 they had effected the "contact drive" and were now in charge of the movement.

Preparations for the reception of the herd were completed early in winter and the station at the summer grazing grounds along the coast near Kitiktuat set for the arrival of the reindeer. The station of the winter range which lies inland along the east branch of the Mackenzie River are ready for the arrival of the reindeer. The station, in charge of the Interior, is in charge of the camp, and his staff includes three Lapp families.

The winter station is the larger of the two and in many ways the more important as the herd will be a greater part of the year on the grazing grounds in its vicinity than on the summer range. The buildings are erected on a fairly level plain about one-quarter of a mile wide from which the Caribou Hills rise to an elevation of about 500 feet. The plain was at one time densely timbered, but the forest was destroyed by fire about half a century ago and the new growth consists mostly of cane birch and spruce. On a high plateau to the east of the station there are no trees but it carries a splendid cover of reindeer moss. This area and that adjoining to the upper Mackenzie lake to the north and east constitute the principal winter range. This station is about fifty miles by winter trail from the summer station and seventy miles by water. The buildings at the winter station include a frame house which is occupied by the officer in charge, a mess hall for herders; a log building as additional sleeping quarters; two warehouses; and a workshop. The station is also equipped with a power boat for patrolling during open navigation. The summer station near Kitiktuat has four buildings, one of which is a frame dwelling and the other three are of log construction. One mile to the north is the main corral, the largest unit of which is 450 feet in diameter. The more northerly grazing area, which is located along the coast to avoid the fly pests in the summer, is well watered and altogether the location of the combined ranges is considered very satisfactory for the first stage of the work of introducing reindeer into the Canadian North.

Trade With Russia

Only Possible When Country Pursues

Methods Of Handling
In an interview with a representative of the B.I.R., Mr. W. West, president of the C.I.R., said that Russia will be back in world trade. "What conditions will forward that consummation?" the reporter asked. "Upon this—it must be clearly understood as to whose rules will prevail. Nothing aside to keep Russia on the outside except this: that she shall adopt and pursue the methods of civilization. If there are adequate tokens of that, Russia, of course, is to be welcomed back into the family of nations."

Unemployment is small in Trinidad, and is expected to decrease shortly.

Settlers Working Out Grants

May Taking Up Northern Land Area

On Relief
Ninety-five per cent. of the new settlers in the north, who took up land under the \$300 and \$500 government settlement scheme last year are on relief now, Arthur Kendall, chief executive officer of the provincial relief commission stated.

These settlers are working out their relief grants, Mr. Kendall said, by clearing out brush along proposed routes, and the general work of pushing roads through the north will be continued this year. This project will provide roads that might otherwise not be started for some time to come.

Mr. Kendall also stated that the situation as far as single destitute men are concerned here is quite satisfactory in the circumstances. He declared that present there are only about a dozen men living at the immigration hall in Prince Albert.

The situation with respect to caring for the single destitute in the province, is generally satisfactory, Mr. Kendall stated. There are cases where men who unfortunates for agricultural work cannot be dealt with except at concentration camps, but they are few in comparison to those taken care of in useful occupations.

A PARTICULARLY SLENDERIZING MODEL GRACIOUS AND LOVELY IN EVERY DETAIL

This charming model favours black rough crepe silk, topped by pale grey crepe, no smart just now.

If it has a new ear of color that is exceedingly becoming, besides detracting from the bodice drapery.

The sleeves have conservative puffs, and are snugly fitted below the elbow.

This easily made model is very luxuriously lovely carried out in crinkly crepe—black, being still popular, or purple, wine-red, blue-brown, or olive.

Style No. 306 is designed for sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust.

Size 36 requires 3 1/4 yards 38-inch with 1 1/4 yard 38-inch contrasting. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Englishwomen Resent

Contention Of Judge

Believe Themselves As Competent As Men On Difficult Jury Cases
English women jurors intelligent enough to bear complicated lawsuits involving life issues?

Lord Justice Scrutton said, adding that the British majority of the lords of appeal in London, England, started a free-for-all controversy when he virtually answered this question in the negative in the course of a judgment. Scrutton, 70 years old, and one of the British majority of the lords of appeal in London, England, started a free-for-all controversy when he virtually answered this question in the negative in the course of a judgment.

He then made the remark which has set Englishwomen by the ears. In which the plaintiff's counsel had awarded damages totaling two and a quarter million dollars, his lordship praised the jury for their handling of the evidence in a tangled case lasting in all 24 days.

There was no woman on the jury," Justice Scrutton said, adding that that is an advantage where heavy business transactions have to be considered. The documents this jury of men asked for were very material documents, and the jury showed very great intelligence in grasping the business problems presented to them.

Leading feminists immediately attacked this remark both and said, declaring that the English women have been given the right to sit on juries, they should be considered competent enough to hear any case, however difficult.

Against this contention prominent lawyers have stated it is better that judges should hear cases in which everyday business is involved, pointing out that men are quicker at grasping business problems.

But the women have not had their last word yet, and there are indications that a movement will be launched to enforce equal rights for jurymen.

Alberta Sugar Beet Crop

Sugar Produced Expected To Total 45,000,000 Pounds

Final estimates of Alberta's sugar beet crop for the past season, given by the Raymond sugar factory, show that 150,000 tons of beets were harvested over the contracted acreage, and the sugar run will total 45,000,000 pounds. The beet growers of southern Alberta this year passed the 10-ton per acre average for the total acreage under contract. In one district the average reached almost 12 tons, while some individual crops ran 15 to 20 tons. The season yielded the heaviest crop yet known in the province. With increased capacity installed last fall, the factory at Raymond produced 450,000 bags of sugar this season, or about six times the amount turned out in 1925.

Bargain For Some One

Walter Lund, 24, Winnipeg fireman, seeks to win his personal happiness by getting married. Any woman who will pay his \$200 hospital bill, provide him with a good home and pay for a full course of gutter lessons can have him for husband, he has announced.

Knocked down by a locomotive. G. A. Felgar, 45, of Brighton, England, lived for two days with a broken spine.

SMILING STARS AT PREMIERE

Two of movie's leading lights, Douglas Fairbanks, Jr., and his wife, the talented Joan Crawford, are shown as they arrived at a Hollywood theatre for the premiere of a new picture recently. The smiles that are displayed by the popular couple here seem to give the lie to rumors that have circulated lately that all is not well in the Fairbanks household.

Shoots Elk In Alberta

Veteran Sportsman Proudly Displaying Handsome Set Of Antlers

One of the first hunters to bring down an elk in northern Alberta since the ban on shooting of these animals was removed in certain parts of the province, George Pink, an sportsman of Falun, is proudly displaying a handsome 13-point set of antlers.

The animal was shot by Mr. Pink in the Braemar district about 70 miles northwest of Edmonton, where the Braemar River joins the Saskatchewan.

The particular elk that fell to Mr. Pink was one of three feeding at a rancher's haystack close to the Saskatchewan River.

The antlers measure 56 inches from tip to tip and an equal distance from the base of the head to the tip of the longest antler. This is a fairly large set, according to Mr. Pink.

Some years ago Mr. Pink shot a deer that veteran hunters declared was the third largest ever shot in the province.

Another comment he aroused much interest by shooting an albino woodpecker.

He is extremely plentiful in the Braemar district the hunter states.

Proud Of Health Record

Commensurable Diseases In Alberta Last Year Lowest On Record

General health conditions in Alberta during the past year were the best on record, so far as communicable diseases were concerned. The provincial department of health sums up the year in this respect, remarkable, establishing a new high mark for freedom from such diseases.

Notwithstanding economic conditions, which might naturally be expected to aggravate ill-health, there was a marked improvement in 1926 over any previous year.

The death rate for the year will fall somewhat below that of the previous year, which was 7.2 deaths per 1,000 population. Infant mortality in 1926 made a considerable and highly satisfactory drop, being only 58 deaths of children under one year of age, out of 1,000 living births, as against 67 the year before.

Other figures that, along with the death rate of infants, are regarded as particularly significant of the general health situation are those showing the maternal mortality rate. This was 8.5 per 1,000 living births, the lowest since the department has been keeping records.

How To Make Time

People Who Do Not Idle On Job Accomplish Much

People who get through an immense amount of work are always those who know that idling must not be allowed to put forth a covetous hand and steal five minute here and half an hour there. They can obtain a succession of successful results of accomplishment, as a good farmer can obtain the most from his land by a most per rotation of crops. It is often found that the busiest folk are those who find time to say hello to a friend or neighbor, for they know how to fit in one thing with another, till they are actually said to be able to "make" time when wanted.

Marked Increase In The Number Of Inhabited Farms In Saskatchewan Is Noted

A Fisherman's Paradise

New Map Of Port Of The Muskoka Lakes Region

Persons familiar with lakes Simcoe and Couchiching and the western portion of the Trent Waterway will welcome the publication of the new Ontario map sheet by the Topographical Survey, Department of the Interior, at Ottawa. This map adds the Muskoka sheet which lies immediately north of it. These two maps, together with the Parry Sound and Blyth Inlet sheets already published, and the Sudbury sheet which is expected at an early date, include a part of Ontario famed far and wide for the facilities which it offers for sport and recreation. These maps are produced co-operation with and from joint surveys with the Department of Survey, Province of Ontario.

The Ottawa sheet borders Georgian Bay, one arm of which extends into it and forms several excellent deep-water harbours. These ports have railroad connections with Port Huron, Montreal, and there is a considerable freight movement to and from the upper lakes. The Trent Waterway has been shown on the map. This water route is approximately 200 miles in length extending from Georgian Bay to Trenton on the Bay of Quinte on Lake Ontario. It is a series of navigable lakes and rivers connected by short stretches of canal and provided with the necessary locks and dams to enable vessels to cross the watershed. It follows the old Indian route between Lakes Huron and Ontario.

The first white men to traverse it were Champlain and a few followers who, returning from Georgian Bay in 1615, accompanied a large party of Huron Indians to Lake Ontario. The connecting links were built by the Dominion Government and the waterway is operated by the Department of Railways and Canals without fee or toll. This route from one great lake to the other passes through some of the finest scenery in Ontario.

The country is noted as a "fisherman's paradise." It affords unlimited opportunities for boating, bathing, fishing, hunting, rest, all under the spell of the most beautiful and invigorating surroundings. A few hours spent on standard equipped trains or over improved Provincial highways reaches many of its beauty spots in a day or two and serves to illustrate its wide. Generous hunting and fishing privileges are available to all. Excellent accommodations are perfectly adapted hostilities, summer hotels, camps, and cabins are available at reasonable rates. Lakes Simcoe and Couchiching, with their many fine beaches and Lake Muskoka with its gem-like inlets are favourite summering places for the families of business and professional men from Ontario and adjacent United States cities. The particularly healthful and invigorating character of the establishment of several sanitariums.

One Of Perishable Foods

Eggs Should Be Kept In Clean Cool Place

Eggs belong to the same food class as meat or milk. They are almost as perishable. Just because they are enclosed in a hard shell, they get rough treatment. The egg shell is porous. Dirt and filth and mold and disease germs can pass through and spoil an egg. The water of the egg will evaporate through the egg shell almost as fast as if it were in an open pan.

Many a housewife allows eggs to grow stale on a warm pantry shelf or to take in the odors of a food locker and then blames the farmer or grocer for selling bad eggs.

It costs almost as much to produce a bad egg as to produce a good egg. Most egg losses are, actually, preventable.

A Lucky Escape

One night a man in a car was run down at the level crossing. Consequently the old signalman in charge had to appear in court. After a grueling cross-examination he was still unshaken. He said he waved his lantern frantically, but all to no avail.

The following day the superintendent of the line called him into his office.

"You did wonderfully well yesterday, Tom," he said. "I was afraid at first that you might wear."

"No, sir," replied Tom, "not as long as that lawyer didn't ask me whether my lantern was lit."

Oldiers Use Mountain Top

Flying from the top of Knocknaghtin, above Greenan, Ireland, the aviators have a fine sport of members of the Ulster Gliding and Aviation Club. On the mountain top is an extensive, but rough tract of waste land, and from this the gliders have started long flights. Attempts to break height and endurance flights are being made.

A stocking 80 feet long hung from the roof of Albert Hall, in London, England, during a Christmas sale.

ARE THEY FED UP?

Any one who has been following the debate in reply to the speech from the throne in the provincial legislature must surely have come to the conclusion that the speakers for the different opposition groups, have a much better grasp of conditions, and by submitting definite suggestions for remedying them have shown beyond question that they are taking their position seriously and are willing to render all possible assistance to the government to improve provincial conditions.

Even Labor members who support the government in session and out, have added their bit of criticism.

On the other hand the government speakers, who have not been entirely on the defensive, have been rather inclined to treat criticisms and suggestions more or less in a jocular manner.

Another thing which has been quite noticeable is, that although this is supposed to be a farmers government, supported by Labor, most of the suggestions made for the improvement of the small property owners, the producers of food stuffs and Labor organizations, have been brought forward by Conservative, Liberal and independent members of the house.

On the whole the session so far looks very much as though the government supporters are being carried away by the apparent security of their position or are fed up and ready to throw in the sponge.

It now appears that what has been termed the U. F. A. government in this province will, in future, be known as the C. C. F. government. Mr. Howson, leader of the Liberal party, was right when he suggested in effect that if the government is going to change its name and adopt the C. C. F. platform it should first go to the country for the endorsement of the electors.

General satisfaction is expressed throughout the west on the appointment of Milton Campbell a Saskatchewan farmer, to the tariff board. This will give the farming industry good representation on this important board.

Members of the Royal Air Force of Great Britain now hold the world record for speed, altitude and distance, and Sir Malcolm Campbell's Bluebird is the world's fastest automobile. The supremacy of British-made engines has been thoroughly established.

JUST FOR FUN

HIS DISTINCTION

There was a young man of De-
vizes,
Whose ears were of different
sizes;
The one that was small
Was of no use at all,
But the other won several prizes

Redcliff Reminiscences

Taken from our file of Feb.
27 - 1914

The Ornamental Iron Works
share holders held their annual
meeting on Monday.

All the old officers were re-
elected. Hubert Kelly, pres.;
H. R. Corson, Gen. Manager; E.
F. Hurd Sec.; H. O. Wheeler
Treas.; Trustees W. T. Lock-
wood and Emmet Byrnes.

This plant has been one of
the busiest manufacturing concerns
in Western Canada. It
employs from 125 to 175 men
with a payroll of from \$10,000
to \$16,000 a month.

An uptown telegraph office
will be opened up in a few days
in the Rolovitz building, directly
opposite the Hicks store. The
volume of business has increased
so much of late that it has
become almost too much to handle
from the station.

The Entre Nous Club will hold
their dance tonight in the Palace
Hotel instead of in the Empress
Theatre.

The Board of Trade will hold
a get together smoker and en-
tertainment in the Empress
next Wednesday. Plans for the
coming spring and summer will
be thoroughly gone into.

Mr. E. C. Wallof, president of
the Redcliff Motory Co. returned
to town this week after
spending the past few weeks in
Minneapolis with his family.
Mr. Wallof has established agencies
for the company's trucks
and buses, in Winnipeg, Regina,
Moosejaw, Saskatoon, Edmonton
and Calgary.

Clowe and Baird, barristers,
have decided to dissolve partnership.

The School Board is considering
seriously the building of
three new school houses, since
the present eight room school
will no longer accommodate the
steadily growing school population.
The new schools will be
ready for the fall term.

Louis Rosin of Ottawa, has
decided to build a cigar factory
here, to be in operation by April
next.

A debate on the resolution,
"Capital Punishment should be
abolished," was held on Monday
evening in the Presbyterian
Church. The affirmative was
taken by A. E. Cable, Jas. King,
Wm. Ardinger and George Dun-
nett, while the negative was up-
held by Fred Robertson, C.
Frickleton, John Brown and
Rev. G. L. Gordon. The judges
C. T. Hall, J. Leyland and
G. G. Holl. The negative won.

The Redcliff woodworkers
will resume operations in their
planting mill on Monday morning.

Mr. W. A. Woodward and Mr.
Wm. Buckingham left for New
Zealand Saturday evening.

These young men will be mis-
sed in church circles.

Mr. Bearist has been ap-
pointed manager of the Merch-
ants Bank here to take the place
of Mr. E. P. Murdock who has
severed his connection with the
bank.

Travel in Effigy on Pioneer Railway

Upper—The figures that set in effigy for their
work in Vancouver during Diamond Jubilee week. Lower—
Hillier standing in Vancouver.

Traveling in effigy on the Railway that made
possible the union of the Canadian provinces, the
Fathers of Confederation recently journeyed from
Toronto to Vancouver via the Canadian Pacific Rail-
way. Their trip was part of the program of a Van-
couver department store in connection with the Dia-
mond Jubilee Celebrations.

The "Fathers" were sculptured in Toronto by
Merle Foster after months of research among the
archives at Ottawa. Little did these stalwart dream
that reproductions of themselves would travel in for
greater comfort than their real selves could command
six decades ago.

Every consideration was given for their welfare,
their faces were carefully protected with soft gauze;
their bodies swathed in the finest of excelsior. They
travelled de luxe in individual crates wrapped in
building paper—justrapped and exclusive.

On arrival carpenters carefully helped them from
their resting places and brushed their clothes as
so-soberly as if they had been millionaires in a
barber shop. They were then comfortably seated
around the conference table where they continued in
conference day and night for three solid weeks.

Those in charge of their tour have not yet decided
upon a future itinerary.
Alexander T. Galt (left) and Thomas D'Arcy
McGee emerge from their enclosures as fresh as ever
after travelling nearly three thousand miles by
Canadian Pacific Railway from Toronto to
Vancouver.

EXCESS FAT MELTS

Under Treatment that Creates Energy

Many folks are naturally fat, but there's a lot of people who put on pounds of unhealthful fat because they haven't got enough energy to move about to keep it off.

It's not laziness in most cases—but a condition brought about by sluggishness of the internal organs—the liver, bowels, and kidneys. As a result, poisons and harmful acids build up, vigor, ambition, and energy get into the blood—the whole general tone of the body is lowered and fat accumulates.

Thousands of overweight men and women find in Kruschen Salts, a perfectly safe, sure, and beneficial means of reducing.

The "little daily dose" of Kruschen Salts keeps the organs functioning properly every day, and fills you with such a feeling of radiant vitality and vigor that before you know it you are fairly "jumping out of your skin" with energy, instead of dragging around—and reduction follows as a matter of course—Nature's plan to that.

FREE TRIAL OFFER

If you have never tried Kruschen Salts, we have a special offer for you. We will send you a box of Kruschen Salts, containing 14 days' supply, absolutely free of charge. No obligation on your part. Just fill in the coupon below and send it to us.

Just enclose one of your recent 10c. bottle labels with a separate trial bottle label, and we will send you a box of Kruschen Salts, containing 14 days' supply, absolutely free of charge. No obligation on your part. Just fill in the coupon below and send it to us.

Write to: Kruschen Salts, Ltd., 1700, Broadway, New York, N.Y. 10019. Please send me a box of Kruschen Salts, containing 14 days' supply, absolutely free of charge. No obligation on my part. Just fill in the coupon below and send it to you.

WORLD HAPPENINGS BRIEFLY TOLD

The ages of 128 old people entertained to a tea and concert by the Rotary Club of Haring (Essex) and the Wesley Guild totalled 9,929 years.

Professor Augustus, who has said that men may fly to other planets in rocket planes in the future but will not be able to come back.

John Galsworthy, British novelist and dramatist and 1932 Nobel prize winner, died January 31. He was 65 years old.

Building societies in England have advanced an average of \$253,000,000 a year in the last three years to home builders.

Further cuts in federal appropriations for agriculture are believed inevitable in the estimates for the fiscal year beginning April 1 next.

Increased tariffs on imports to Britain has placed in a precarious condition the hand-weaving industry, started by the Free State Government in South Donegal five years ago.

Curtailment of war debts owed the United States has been approved by member organizations of the Chamber of Commerce of the United States.

Possible use of the X-ray to bring down airplanes was discussed at a group of scientists by Dr. J. W. M. Dumond, research fellow at the California Institute of Technology, Los Angeles.

The Italian Government accepted the offer of the United States Government for a discussion of the war debt as soon as possible after Franklin D. Roosevelt takes office as U.S. President.

Hon. Vincent Massey, former Canadian Minister to the United States, told the Central Ontario Liberal Association executive at Oshawa, Ont., that if the Liberal party succeeded in gaining power, the first step taken "would be to drop the tariff."

Japan's Exports Higher

Shipments of Cotton Material and Silk Improve Trade

Japan's shipments of silk, of rayon and cotton materials in 1932 and of cotton materials are said by the Commercial Intelligence Journal to account for an improvement in her export trade. For the first time she has exported more cotton cloth than Great Britain, the figures for the first ten months of 1932 being: Japan, 2,642,317,000 yards; Britain, 1,620,248,000 yards, the most more of this material to India than India's British overland did—Toronto Weekly Star.

Peru has placed a tax on ice.

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Now

—No Calomel—

When you feel like, depressed, even on the best of food, it's your liver that's the trouble. It's not laziness, it's a condition brought about by sluggishness of the internal organs—the liver, bowels, and kidneys. As a result, poisons and harmful acids build up, vigor, ambition, and energy get into the blood—the whole general tone of the body is lowered and fat accumulates.

Thousands of overweight men and women find in Kruschen Salts, a perfectly safe, sure, and beneficial means of reducing.

Announces New Find

Director of Museum Between His Hands

Uncovered Tower of Babel

What is believed to be the Ziggurat, or "Tower of Babel," in the ancient city of Akkad, has recently been discovered by Dr. Leroy Waterman, director of the University of Michigan-Cleveland Museum archaeological excavations in Mesopotamia.

The find is a mound about 30 feet high and 200 to 300 feet in diameter. The outer structure is a circular wall of sun-dried bricks, 30 feet thick and 15 to 20 feet high. Above the level of the wall are alternate layers of bricks and earth. The north side of the mound is a solid structure of unburned bricks.

Inscriptions in the mound appear to confirm the early origin of the structure, which dates back to about 4,000 B.C.

The Tower of Babel, according to legend of the Book of Genesis, was built by inhabitants of Babel with the intention of climbing to heaven. They were, however, prevented through their speech being confounded.

Always Fools the Bill

No Call For Funds Ever Appeals British Taxpayer

John Bull is used to paying. He has been paying ever since the war, and has become hardened to standing treat to the nations. The plea of conviction, prevalent about that, was, however, prevented through their speech being confounded.

That whiffers happens John Bull will foot the bill, so sedulously fostered by successive British Governments, is as strong as ever. Then the staggering prospect of handing over colossal sums to the U.S.A. while getting not a penny from our own debtors does not appeal the British taxpayer. He knows from long experience that he is "for it" in any case—London Times.

Japan Says No Naval Base To Be Established in the Pacific

The report of the mandate commission, presented to the League of Nations Council, in referring to rumors that Japan was establishing a naval base in Pacific island under Japanese mandate, expressed satisfaction with the Japanese government's denial.

"The report is unfounded," the Japanese government is reported to have replied to the commission's inquiry. "The government has not contemplated and has no intention in the future of contemplating the establishment of a naval base in the islands under mandate."

The apparatus consists of three large, megaphone-like, one sound the automatic whistle; the other two are "sax." Sounds from either side reach one "ear" a tiny fraction ahead of the other, sounds dead ahead, or arrive simultaneously.

Hollanders Find Valuable Articles Tourists Leave On Beaches

Combing the beaches is a profitable occupation for thirty Hollanders. When the tourists all go home from the sea each year they take out claims and work patiently for weeks.

They go over the same patch of sand again and again, allowing for the influence of wind and waves. Some of the "miners" make considerable hauls, consisting of coins, gold and platinum, jewelry and other articles of value.

Miss Jean Forsyth Of Edmonton Was Able Journalist

A clever musician and able journalist, Miss Jean Forsyth, 32 died in Edmonton after a short illness. She was a resident of Edmonton for 23 years and long prominent in the Edmonton Humane Society.

The wide circle of book readers, she was known as "Clifford," a sparkling chatter with a host of admirers.

Miss Forsyth was born at Chatham, Ont., and after attending school in Toronto, studied abroad for a considerable time in Italy and elsewhere. In the early 90's she came west to Winnipeg where she sang and taught singing. One of her pupils later the famous Canadian singer, Miss Doherty Miller.

It was while in Winnipeg that Miss Forsyth founded the Humane Society of that city, believed to be the first of the kind organized in western Canada.

Backing Barter Scheme

Hungarian Banks Have Established Joint Office To Co-operate

Six important Hungarian banks decided to co-operate in order to promote the exchange of goods by barter, according to word received by the Montreal Board of Trade. The banks have established a joint office in Budapest for this purpose.

The scheme is being backed by the Hungarian government and participating in the plan of the British and Hungarian bank indicates, it is claimed, Great Britain's determination to foster the Hungarian barter scheme.

United Kingdom and British empire products.

A correspondent says he would like to know the exact number of people in this country who don't play bridge. To start him off, we'll give him the name of the gentleman who was our partner the other night.

Hungarian Banks Have Established Joint Office To Co-operate

Six important Hungarian banks decided to co-operate in order to promote the exchange of goods by barter, according to word received by the Montreal Board of Trade. The banks have established a joint office in Budapest for this purpose.

The scheme is being backed by the Hungarian government and participating in the plan of the British and Hungarian bank indicates, it is claimed, Great Britain's determination to foster the Hungarian barter scheme.

United Kingdom and British empire products.

A correspondent says he would like to know the exact number of people in this country who don't play bridge. To start him off, we'll give him the name of the gentleman who was our partner the other night.

Andromeda are to be constructed on the Persian Gulf for the Kingdom of India.

Congress has revised the Larriv 22 times.

Three hundred children of British soldiers from foreign stations had their first glimpse of England when their fathers arrived home at Southampton recently.

A rainfall of one inch is equal to 100 drops of water to tell you it takes a snowfall of about twelve inches to equal one inch of rain.

The apple tree grows more rapid than any other fruit tree.

Stabilization Of The Pound

Useless For Great Britain To Return To The Gold Standard

It is useless for Great Britain to return to the gold standard "unless and until it shows some reasonable prospect of becoming a stable standard," said Lord Milner, former chancellor of the exchequer, stating while presiding at the annual meeting of the Midland Bank.

Milner said the pound sterling had shown "much greater stability than the dollar," since suspension of the gold standard. His pronouncement was the third made recently by the heads of large British banks, and came after similar statements by Frederick Crawford, Goldsmid, chairman of Barclay's Bank, and Sir Henry Gooch, chairman of the National Provincial Bank.

Milner said the 1932 business level in the United States was considerably below that of 1931, while the level in Britain was practically maintained.

Controlled inflation was widely regarded as the best solution of price problems, Milner said.

He said that hopes aroused by the Lanesian reparations conference "vanished in the face of disappointment regarding war debts to America."

Ancients Had Airplanes

Record Of Flights Given In Avestan Sacred Writings

There is reason to believe that someone constructed an airplane which Solomon gave to the Queen of Sheba. Of course, there was no motor—possibly it was a glider. The secretary of the Royal Aeronautical Society states that Solomon gave to Queen of Sheba "a vessel wherein one could traverse the air for wind."

There are other references to flight in Avestan sacred writings, and there is a long description of the mysterious way in which the Queen of Sheba's son Meneshek left Solomon, journeying to his mother's realm.

"No man hauled his wagon, and whether it was men, or horses, or mules, or loaded camels, each was related to the ground in a light of a cubit."

A cult, according to the ancient Egyptians, measured about twenty inches, but elsewhere it is recorded that over the Red Sea they were lifted up three cubits, and everyone traveled like the eagles in an eagle when his body glided above the wind."

Known To Book-Readers

Miss Jean Forsyth Of Edmonton Was Able Journalist

A clever musician and able journalist, Miss Jean Forsyth, 32 died in Edmonton after a short illness. She was a resident of Edmonton for 23 years and long prominent in the Edmonton Humane Society.

The wide circle of book readers, she was known as "Clifford," a sparkling chatter with a host of admirers.

Miss Forsyth was born at Chatham, Ont., and after attending school in Toronto, studied abroad for a considerable time in Italy and elsewhere. In the early 90's she came west to Winnipeg where she sang and taught singing. One of her pupils later the famous Canadian singer, Miss Doherty Miller.

It was while in Winnipeg that Miss Forsyth founded the Humane Society of that city, believed to be the first of the kind organized in western Canada.

New Machine Demonstrated

Inventor Claims His Machine Will Double Own Horse-Power

Aeroplane that can fly as long as its parts are kept in repair, lines that can cross the Atlantic without anything but a little oil in its machinery, trains that can travel up and down Canada without coal, manufacturing plants self-contained so that they require no hydro service, practically unlimited power and heat in the home for almost nothing—a new industrial revolution, in short, is promised through the invention of a machine by J. M. Mitchell, of Grimsby, providing the machine does everything he says it will, when it is tested.

"I have applied for patents," Mr. Mitchell said. "I am covered in every country in the international patent agreement. I told my patent agent that I would double his fees if he could show me where I am wrong, but he couldn't."

"I took my idea to Toronto University, and they could not find any flaw in my theory. They couldn't find a fallacy, but they couldn't do it."

"But the proof of the pudding is in the eating. I have made a machine that doubles the horse-power that is applied to it. That's complete answer to the sceptics. Incredible—but it works."

A demonstration of the ability of the machine to perform what its inventor claims was given for newspaper reporters here, a small model had been set up fitted with a tiny motor. The motor runs a lifting device and certain weights are raised at a specified speed. When the Mitchell appliance was applied to the apparatus, the same motor apparently doubled its weight without loss of speed or lifting.

Recipes For This Week

(By Betty Barclay)

SWEET CROQUETTES

- 1 cup stale cake crumbs.
- 1/4 cup chopped, blanched almonds or shredded coconut.
- 1/4 cup creamed sugar.
- 1/4 cup lemon juice.
- 1/4 cup orange juice.
- 1 egg yolk.
- 1 egg white.
- 1/2 cup flour.
- 1/2 cup cake flour.

Mix first four ingredients in saucepan, add orange juice, to moisten, and lemon juice. Heat to boiling point; remove from fire; add egg yolk, and cool. Shape as croquettes; dip in flour, then in egg white, then in one tablespoon cold water; roll in sifted dry bread or cake crumbs, and fry in deep fat. Sprinkle with powdered sugar, and serve with chocolate sauce.

FIVE O'CLOCK TEA RUSKS

- 2 1/2 cups special cake flour, sifted.
- 4 teaspoons baking powder.
- 1/4 teaspoon salt.
- 1/4 teaspoon cinnamon.
- 1/4 teaspoon nutmeg.
- 2 tablespoons brown sugar.
- 2 tablespoons butter or other shortening.
- 1 egg, well beaten.
- 1/2 cup milk or water (about).

Mix first four ingredients, add baking powder, salt, onion, and brown sugar, and sift together three times. Cut in shortening. Combine egg and liquid. Add liquid gradually until soft dough is formed. Turn on floured board. Cut in 1 1/2-inch pieces. Shape into balls. Place together in well-greased shallow pan. Brush with milk, sprinkle with additional brown sugar. Bake in moderate oven (375 degrees Fahrenheit) 15 to 20 minutes. Makes 2 dozen small rusks.

Three hundred children of British soldiers from foreign stations had their first glimpse of England when their fathers arrived home at Southampton recently.

A rainfall of one inch is equal to 100 drops of water to tell you it takes a snowfall of about twelve inches to equal one inch of rain.

Fatboy
By Ruth Rogers

DELIGHTFUL FOR SCHOOLBOYS IN THIS PUFFED SLEEVES

It has such a pretty neckline. The snug hips give it smart sophistication the growing girl adores. At the center-front, there is an inverted pleat to give the skirt ample fullness and yet retain its slim line.

The original dress was carried out in dark blue and blue wool crepe, the collar 'leg' of light blue and blue crepe. Note how the collar terminates in a jabot.

The pattern also provides for long sleeves as in small back view. Plaided woolens, wool jersey, wool cables and tweed-like cottons are sturdy smart ideas.

For more "slim" make it of crepe or silk in geranium red and blue. Style No. 954 is designed for sizes 8, 10, 12 and 14 years.

Size 8 requires 1 1/2 yards 36-inch and 1/2 yard 35-inch contrasting. Price of pattern 20 cents in stamps or coin (as preferred). Wrap coin carefully.

THAT in Stanley Park, Vancouver, British Columbia, this beautiful & charming immortalizes Pauline Johnson, Canada's only Indian poetess? The rock upon which her features have been engraved is one from which she used to gaze out over the Pacific while she was composing some of her famous poems. At her request her body was distributed over the waters of the sea close to the foot of this rock.

Interesting Local Items

Miss Davison, of Bowell, is the guest of Miss Broadfoot this week.

Miss Phyllis Sanderson leaves on March 1st to enter the Medicine Hat Training School for nurses.

The Ladies' Auxiliary to the Legion will hold their general meeting at 2:30 on Wednesday afternoon, March 1st, in the I. O. O. F. Hall. Mrs. Obeur will be the hostess.

About 20 local badminton players will go to Medicine Hat on Tuesday evening next to play off a return tournament with the players of Memorial Church club.

Mrs. H. G. Sheasby was the hostess at a pleasant tea and handkerchief shower on Wednesday afternoon in honor of Miss Phyllis Sanderson who leaves shortly for the nurses training school in Medicine Hat.
